

Barcode reader

To install the barcode reader, follow these steps:

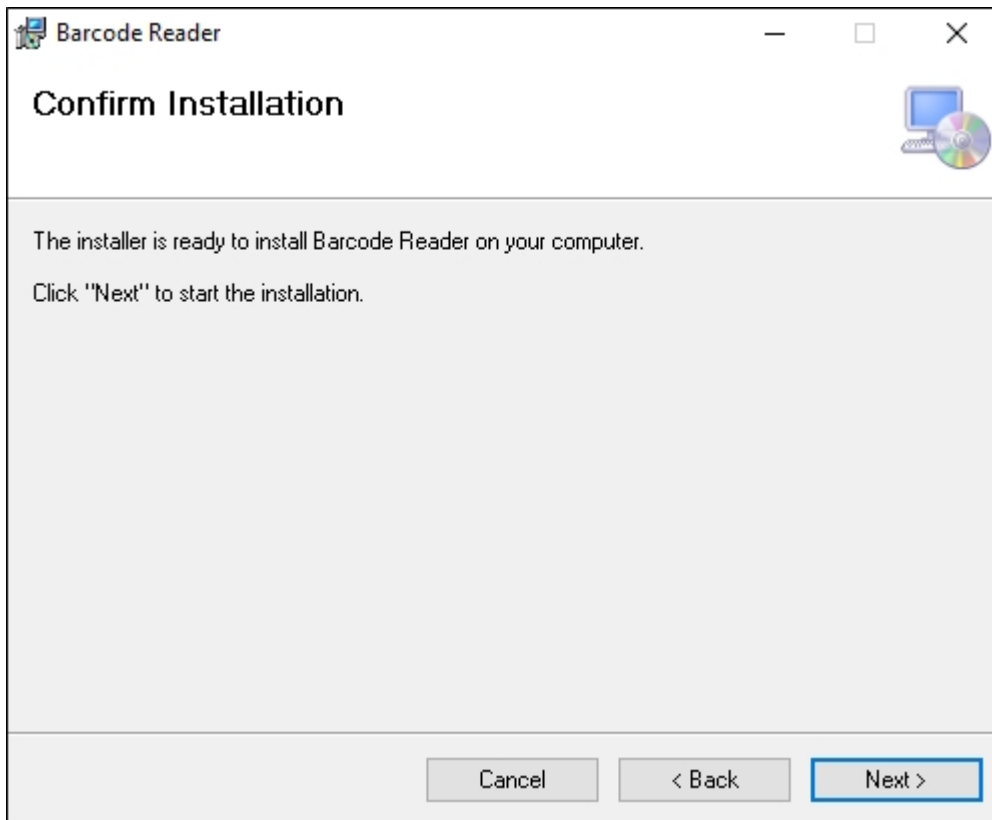

1. Go to <http://releases.trasix.one/barcodereader/BarcodeReaderSetup.msi>, the installation file is downloaded,
2. Open the file, the wizard starts as shown below:

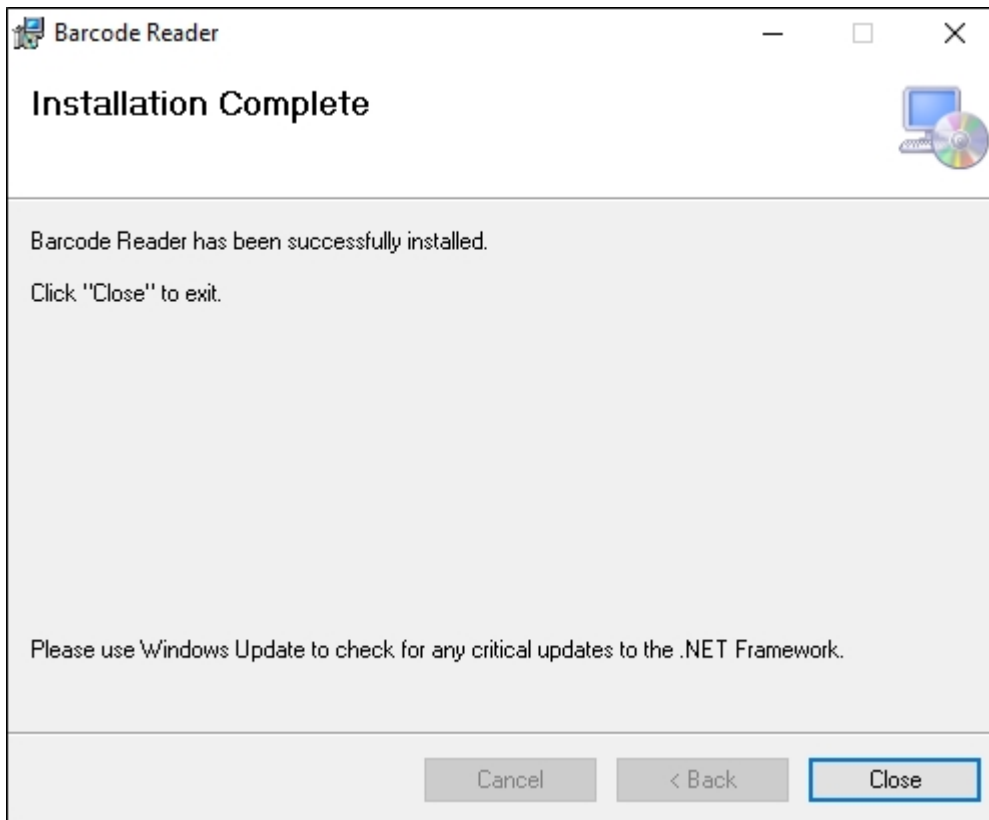

3. Click **Next**, the following window appears:

4. Select the location in which you want to install the application, then click **Next**, the following window appears:

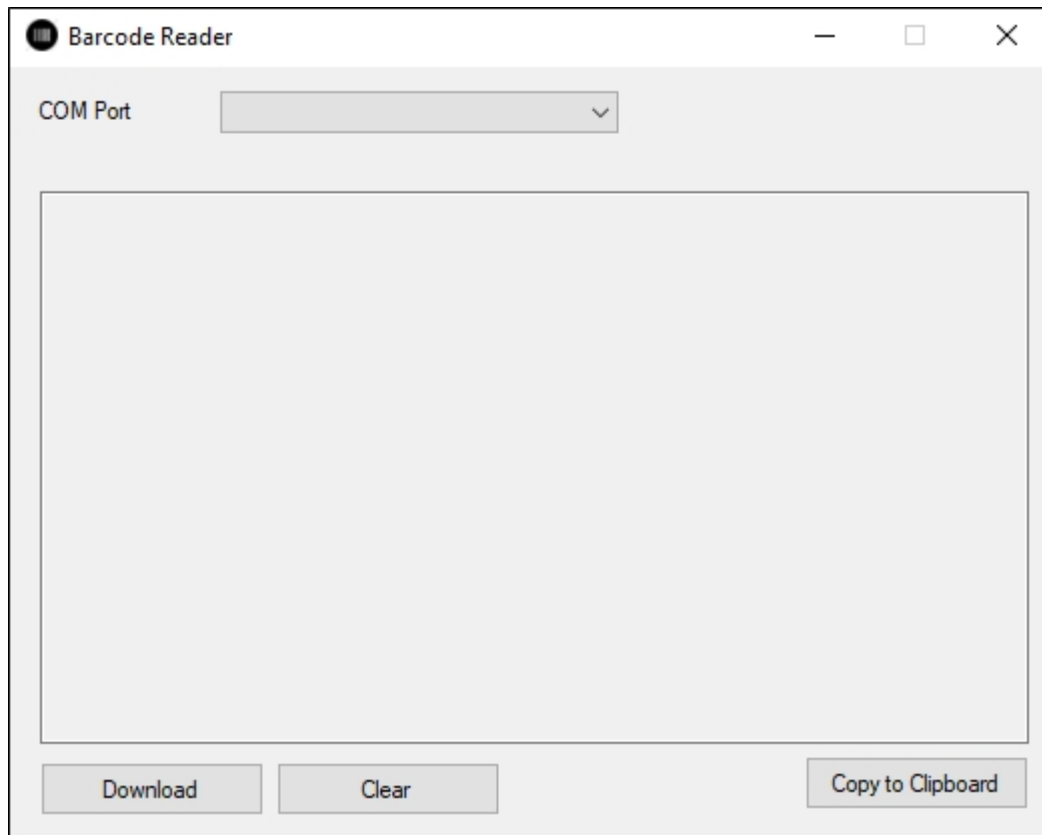

5. Click **Next**, the installation progress is displayed, once its done, the following window appears:

6. Click **Close**, the application is installed to your computer.

You can now open the application to scan the barcodes you want, the following window appears:

To scan the barcodes, attach the reader to your computer and select the port, if not selected by default. You can then click **Download** to load the scanned barcodes in the above window. To copy the barcodes, click **Copy to Clipboard**.

You can paste the barcodes in the filter field, paste them to a merch board slide, or wherever needed.

Note:

- You can press Ctrl + / (slash) keys to display the article details for the matching articles when scanning articles through the barcode reader. Pressing the same keys stops displaying the article details.
