

## Export articles

You can export the whole catalog, your favorite articles, a list of articles from an Excel sheet, or a set of articles and their attributes, into PDF, Excel, or Power Point.

To do so, follow these steps:

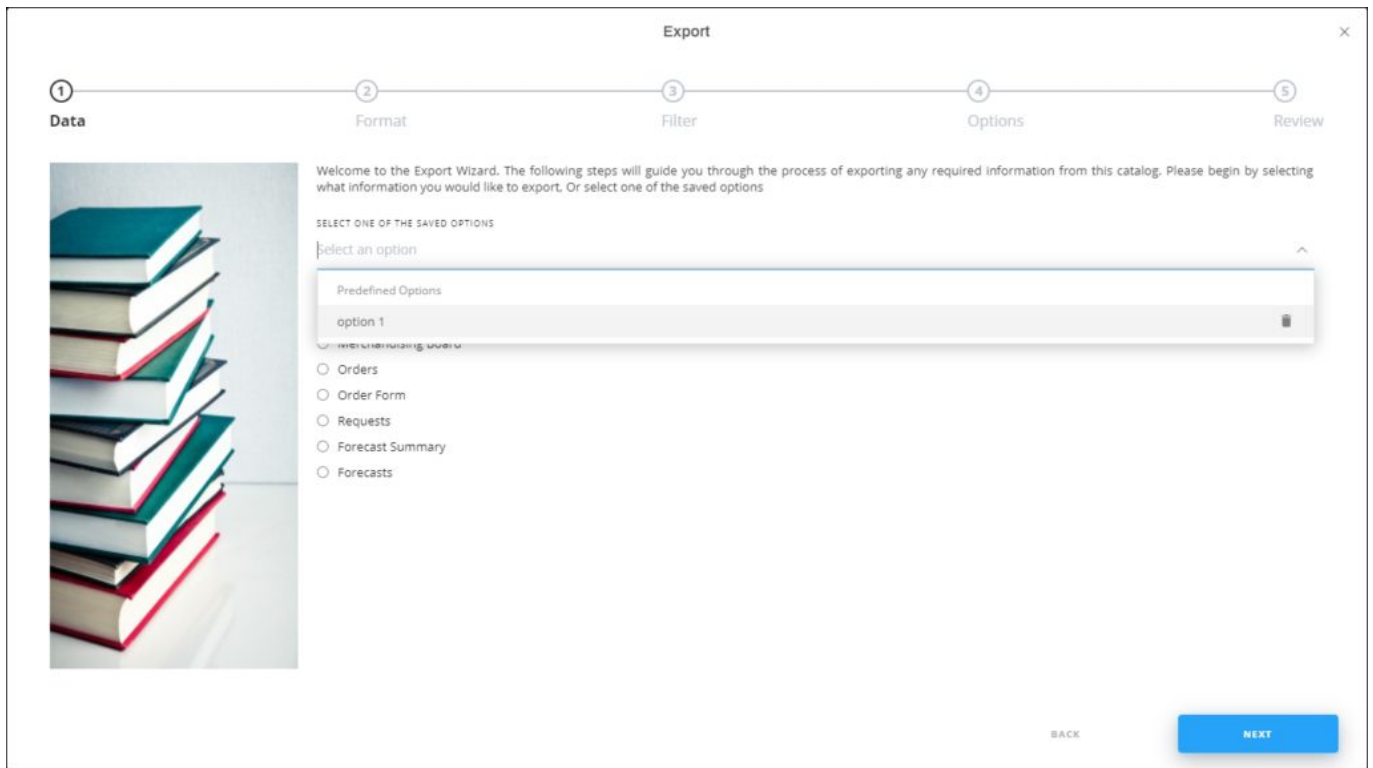

1. Click **Export**, the following window appears:

If options are saved, a menu appears enabling you to select the export option you want as shown below:

Select the option you want, the **Format** window is skipped. You can delete any of the saved options by hovering the mouse over it then clicking the **Delete** icon as shown in the below example:

2. Select "Articles", if no option is selected, then click **Next**, the following window appears:

3. Select the format to which you want to export the articles, if you select Power Point, a new menu appears to enable you to select the template. These templates are managed by Trasix Support team. If you select Excel, you can select the attributes you want to include in the output file,
4. Click **Next**, the following window appears:

5. Click the radio button next to the option you want:

- If you select “Full catalog” all the articles are exported.
- If you select “My favorite”, a dropdown menu appears to enable you to select the favorite tags you want. Favorite tags are pipe (|) separated.
- If you select “From Excel”, you need to browse for the Excel file containing the articles, select the sheet and map the columns. You can also select to use the same order in which articles are listed in the Excel sheet.
- If you select “Selected Articles”, you need to paste a list of article numbers.
- If you select “Selected Styles”, you need to paste a list of style numbers.

6. Click **Next**, the following window appears:
