

Generate slide - Bucket view

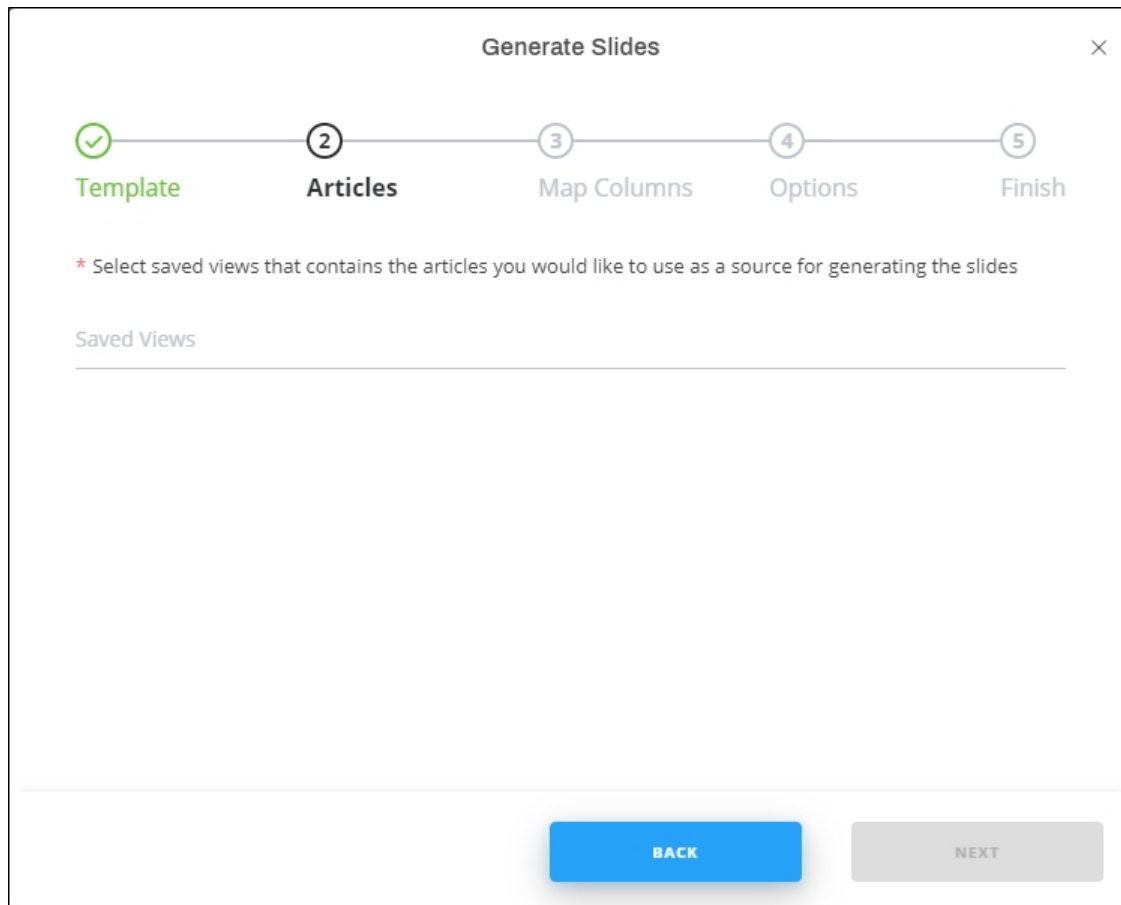

You can create slides with saved views for articles viewed by an attribute and added as a saved view. To do so, follow these steps:

1. Click **Generate**, the following window appears:

The screenshot shows a window titled "Generate Slides" with a close button (X) in the top right corner. At the top, there is a progress bar with five steps: 1. Template (highlighted), 2. Articles, 3. Map Columns, 4. Options, and 5. Finish. Below the progress bar, the text reads: "Please select the template you would like to use and the source from where the articles will be loaded". Underneath, there is a form with two sections. The first section is labeled "* Template" and has a dropdown menu currently showing "Bucket View". The second section is labeled "Articles Source" and has five radio button options: "Full Catalog", "Favorites", "List of Articles", "List of Styles", and "Saved Views". The "Saved Views" option is selected. At the bottom of the window, there are two buttons: a grey "BACK" button and a blue "NEXT" button.

2. Select "Bucket view" from the Template dropdown list, the article source is already selected and cannot be changed,
3. Click **Next**, the following window appears:

4. Select the view you want, you can select more than one,
5. Click **Next**, the following window appears:

6. Select the folder to which you want to add the slides, or click + and add a new folder to which the generated slides are to be added,
7. Select whether you want the slide title to appear on every slide or not,
8. Click the slider button if you want to show the SKU count on slides,
9. Click the slider button if you want to show the style count on slides,
10. Select whether you want to fit the articles into one page, the number of columns field is disabled,
11. Select the bucket level attributes you want to include in the generated slides,
12. Click **Next**, the following window appears:

13. Click **Finish**, slides are generated as shown in the below example:

If the bucket contains inactive articles, it is marked in red as shown in the above example. You can remove or swab those articles as mentioned before.
