

## Modify objects

You can modify the properties of an object for multiple slides whether in one folder or in different folders, such as the object alignment, position, color, etc. To do so, follow these steps:

1. Click **Modify**, the following window appears:

The screenshot shows a dialog box titled "Modify Objects" with a close button in the top right corner. A horizontal line with a circled "1" on the left and a circled "2" on the right spans across the top. Below the line, the left side is labeled "Slides" and the right side is labeled "Properties". Under "Slides", there is a section "\* Select object type" followed by a dropdown menu labeled "Select" with a downward arrow. Below that, there is a section "\* Select the slides" with two items: "Default" and "Winter Collection", each with a square icon and a right-pointing arrow. At the bottom of the dialog, there are two buttons: "BACK" and "NEXT".

2. Select the object which you want to modify,
3. Select the slide(s) or folder(s) for which you want the selected object properties to be modified,
4. Click **Next**, the following window appears:

The above window differs according to the selected object.

5. Make the changes you want then click **Update**.
