

Notifications

This module informs you when a new version is available or being updated on your machine. In addition, it provides the Change log which enables you to manage watch filters and monitor changes done on articles matching the filter within the specified period.

Adding, deleting, and updating attribute values, prices, and segmentations of the matching articles are displayed as shown in the below example:

The screenshot shows the 'Change Log' interface in T1 Studio. The title bar indicates 'T1 T1-STUDIO (QA) - WINTER COLLECTION'. The interface includes a sidebar with navigation icons for Catalog, Favorites, Collections, Resources, Merch, Orders, Refresh Data, Export, and Switch. The main content area has a 'Change Log' header with 'Refresh', 'Filter', and 'Manage Watch Filters' buttons. Below the header is a 'DATE RANGE' section with a calendar icon, the dates '2021-10-18' to '2021-10-19', and a 'REFRESH' button. The table below lists changes for articles, with columns for Article Number, Article Name, Created Date, and various attributes. The table is filtered by 'Article' and 'Request'.

Article Number	Article Name	Created Date	
1215968	Shirt	15 Feb 2021	integer3 2 7
1215968	Shirt	15 Feb 2021	integer3 2 7
21111	21111	14 Feb 2021	Status PS 1 1 0 0
21111	21111	14 Feb 2021	Status PS 1 1 0 0
21112	21112	14 Feb 2021	DateOption Gender GH5 - Male - 4 Feb 2021 Unisex true
21112	21112	14 Feb 2021	DateOption Gender GH5 - Male - 4 Feb 2021 Unisex true

By default, changes done in the past day are displayed and you can change the dates as required.

Also, requests for creating new articles, colorways, carryover, similar articles, and requests for activating and deactivating articles, as well as requests to edit article attributes, segmentations, and retail windows are logged. Below is an example:
