

Colorway summary

You can generate charts for the viewed colorways based on attributes, request data, and price groups, if the catalog is configured to support colorway summary. View the colorways, then click **Summary**, the following charts are displayed based on the catalog configurations:

You can click any of the charts to view its colorways or click **View all** to view all the colorways. Below is an example:

You can use the filter by and row and column dividers as mentioned before, or click **Back** to view the summary charts again.
