

## Edit prices

You can edit prices for one or more colorways. To do so, view the colorway and select “Edit prices” from the Actions menu, the following window appears:

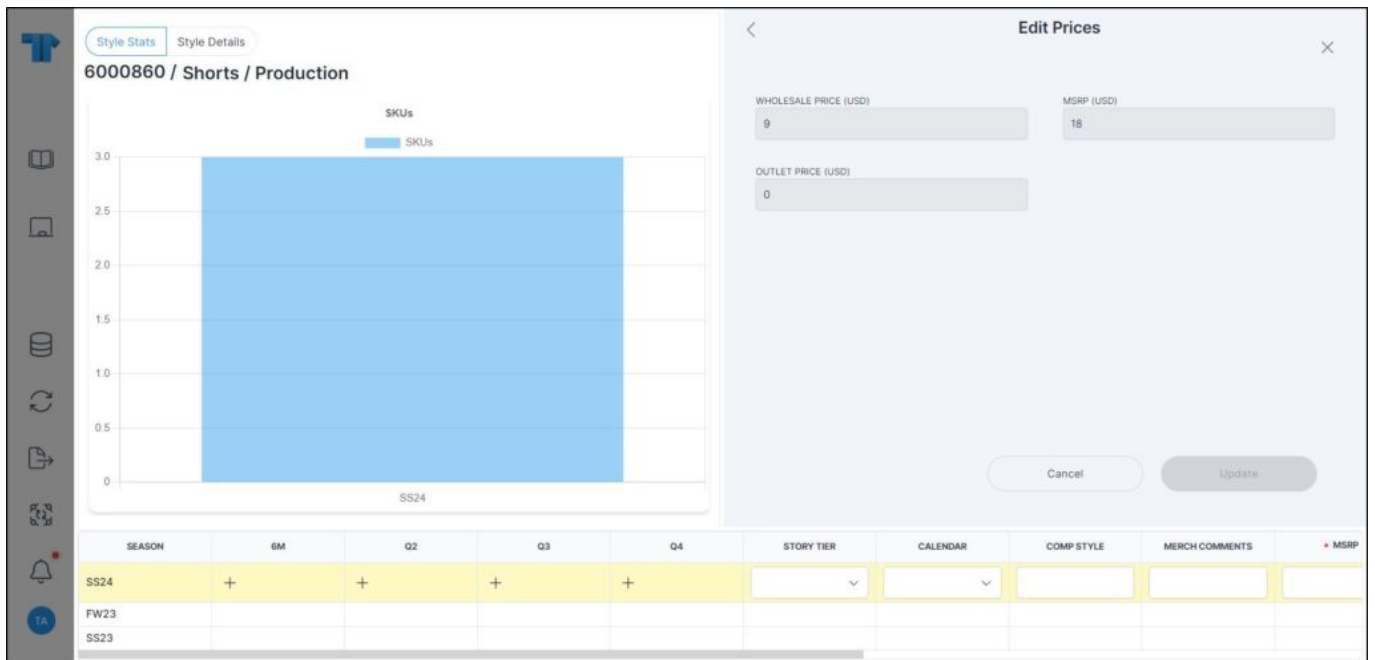

The screenshot shows a software interface for editing prices. On the left, a dashboard displays a bar chart for 'SKUs' with a y-axis from 0 to 2.0 and a single blue bar for 'SS24'. Below the chart is a table with columns for 'SEASON', '6M', 'Q2', 'Q3', 'Q4', 'STORY TIER', 'CALENDAR', 'COMP STYLE', and 'MERCH COMMENTS'. The 'SS24' row is highlighted in yellow and contains 'P01 - Accessories', '+', 'P02 - Accessories', '+', '+', '+', a dropdown menu, another dropdown menu, and '10'. On the right, the 'Edit Prices' window is open, featuring three input fields: 'WHOLESALE PRICE (USD)' (10), 'MSRP (USD)' (10), and 'OUTLET PRICE (USD)' (0). 'Cancel' and 'Update' buttons are at the bottom right.

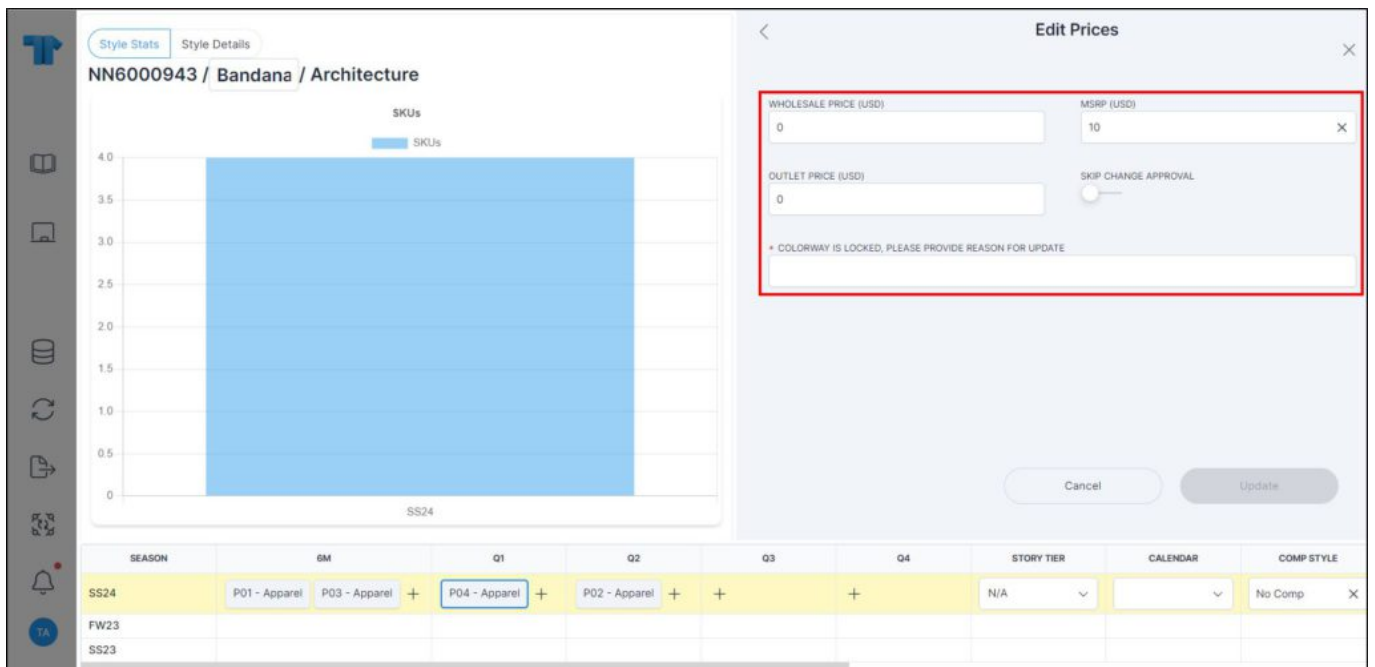

Enter the prices then click **Update**. You can also select multiple colorways then click **Edit prices** and repeat the steps mentioned above.

### Notes:

- If the flag “Apply price by style” is activated for the catalog, the price is updated for all the colorways of that style, if the user has the required privileges.
- If prices are locked for the selected colorway state, they cannot be updated and fields are deactivated as shown in the below example:

- If the colorway is locked, prices cannot be changed directly, and the change should be approved by authorized users in Change management module. Below is an example:

Admin users can click the slider to skip the change approval. Also, when the Price by style slider is activated for the catalog and prices are updated for a model that has at least one locked colorway, the update should be approved through the change management module.
