

Manage colorway state

You can assign a state to one or more colorways. States are defined in T1. To do so, select **Manage colorway state** from the Actions menu, the following window appears:

SEASON	6M	Q1	Q2	Q3	Q4	STORY TIER	CALENDAR	COMP STYLE
SS24	P09 - Apparel	102 - Apparel	+	109 - Apparel	+	+	+	+
FW23								
SS23								

Select the state you want, then click **Update**. States are assigned to the selected colorway. You can also select multiple colorways then click **Manage colorway state**, and repeat the steps mentioned above.

Notes:

- You cannot change the state of a colorway to a previous state. Only the valid states (with a rank higher than the current one) are displayed within the dropdown list. This applies for single and bulk actions.
- If the size scale or attributes are required for the selected state and no values are assigned to them, fields are displayed to enable you to enter the required values, then the colorway is promoted to the selected state. Below is an example:
