2. Enter the article numbers, each on a separate line to create a slide without a title, or fill the article numbers and titles in two columns of an Excel sheet, then you can paste the records,
3. Repeat the steps mentioned above for generating slides for Full Catalog,
4. Click **Next** then **Finish**, slides with articles are generated.

## List of styles

To generate slides using a list of styles, follow these steps:

1. Select the radio button next to (List of Styles), then click Next, the following window appears:

The screenshot shows a 'Generate Slides' window with a progress bar at the top. The progress bar has five steps: 1. Template, 2. Articles (currently selected), 3. Map Columns, 4. Options, and 5. Finish. Below the progress bar, there is a text input area with the label 'List of Styles' and a small red asterisk icon. The input area is empty. At the bottom right, there are two buttons: 'Back' and 'Next'.

2. Enter the style numbers, each on a separate line,
3. Repeat the steps mentioned above for generating slides for Full Catalog,
4. Click **Next** then Finish, slides with articles are generated.

## Excel file

To generate slides using articles from an Excel sheet, follow these steps:

1. Select the radio button next to (Excel File) then click **Next**, the following window appears:

2. Click Select File and browse for the file which contains the articles, then repeat the steps mentioned above for generating slides for Full Catalog,
3. Click **Next** then Finish, slides are generated.
4. If no titles were entered, all articles are added to one slide with title “none”.

## Saved Views

To generate slides using articles from your saved views, follow these steps:

1. Select the radio button next to (Saved Views) then click **Next**, the following window appears:

Generate Slides

1 Template 2 Articles 3 Map Columns 4 Options 5 Finish

Select saved views that contains the colorways you would like to use as a source for generating the slides

\* SAVED VIEWS

Back Next

2. Select the view you want, you can select more than one, slides are generated separately for each view, and the first slide of each view will have the view name as title, while the second slide will have the title “view name – 1”, and so on. Click **Next**, then repeat the steps mentioned above for generating slides for Full Catalog,
3. Click **Next** then **Finish**, slides are generated.
