

## Import customer allocations

You can import a file with customer allocations to add multiple allocations in an easy way instead of adding them individually to T1.

Make sure to have the customer allocations list in an Excel sheet with the following columns: allocation group name, customer code, minimum quantity, maximum quantity, and status. Below is an example of the Excel sheet format:

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D	E	F	G
1	Allocation Group	Customer Code	Min Quantity	Max Quantity	Status		
2	Allocation Group 2	11111	50	200	1		
3	Allocation Group 3	11111	100	400	0		
4	Allocation Group 2	22222	50	500	1		
5	Allocation Group 3	33333	200	800	1		
6	Allocation Group 4	44444	50	200	1		
7							

The spreadsheet is titled "Customer Allocations" and includes standard Excel navigation and zoom controls at the bottom.

The status column can have the following values:

- 0 which means that this allocated quantity is inactive, and you can allocate it to another group
- 1 which means that this allocated quantity is active and assigned to this customer

To import the file, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows the 'Import Data' window with a blue header and a close button (X) in the top right. A progress bar at the top indicates the current step: 1 File (active), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Below the progress bar, there are two radio button options: 'Last Used File' (unselected) and 'New File' (selected). Underneath, there is a text input field labeled 'Filename:' containing the text '[none]', followed by a 'SELECT...' button. At the bottom of the window, there are 'BACK' and 'NEXT' buttons.

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

The screenshot shows the 'Import Data' window with a blue header and a close button (X) in the top right. The progress bar at the top indicates the current step: 1 File (checked), 2 Sheet (checked), 3 Mapping (active), 4 Filter (checked), 5 Validation, and 6 Information (checked). Below the progress bar, the text reads 'Please select the sheet that contains the data you wish to import'. Underneath, there is a dropdown menu with 'Customer Allocations' selected. At the bottom of the window, there are 'BACK' and 'NEXT' buttons.

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your file contains more than one sheet,
6. Click **Next**, the following window appears:

**Import Data** [X]

File — 
  Sheet — 
 **3** Mapping — 
  Filter — 
 **5** Validation — 
  Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

🔍 Search

Customer Code\* =

Allocation Group Name\* =

7. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

**Import Data** [X]

File — 
  Sheet — 
  Mapping — 
  **Filter** — 
 **5** Validation — 
  Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

Import All Rows  
 Import Only the Rows that match the following criteria:

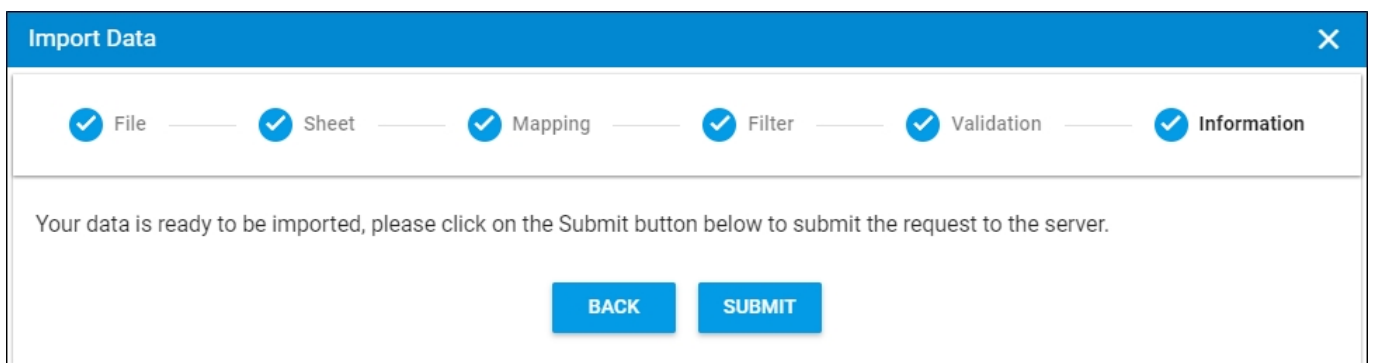

8. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,

9. Click **Next**, the following window appears:

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

10. Click **Next**, the following window appears:

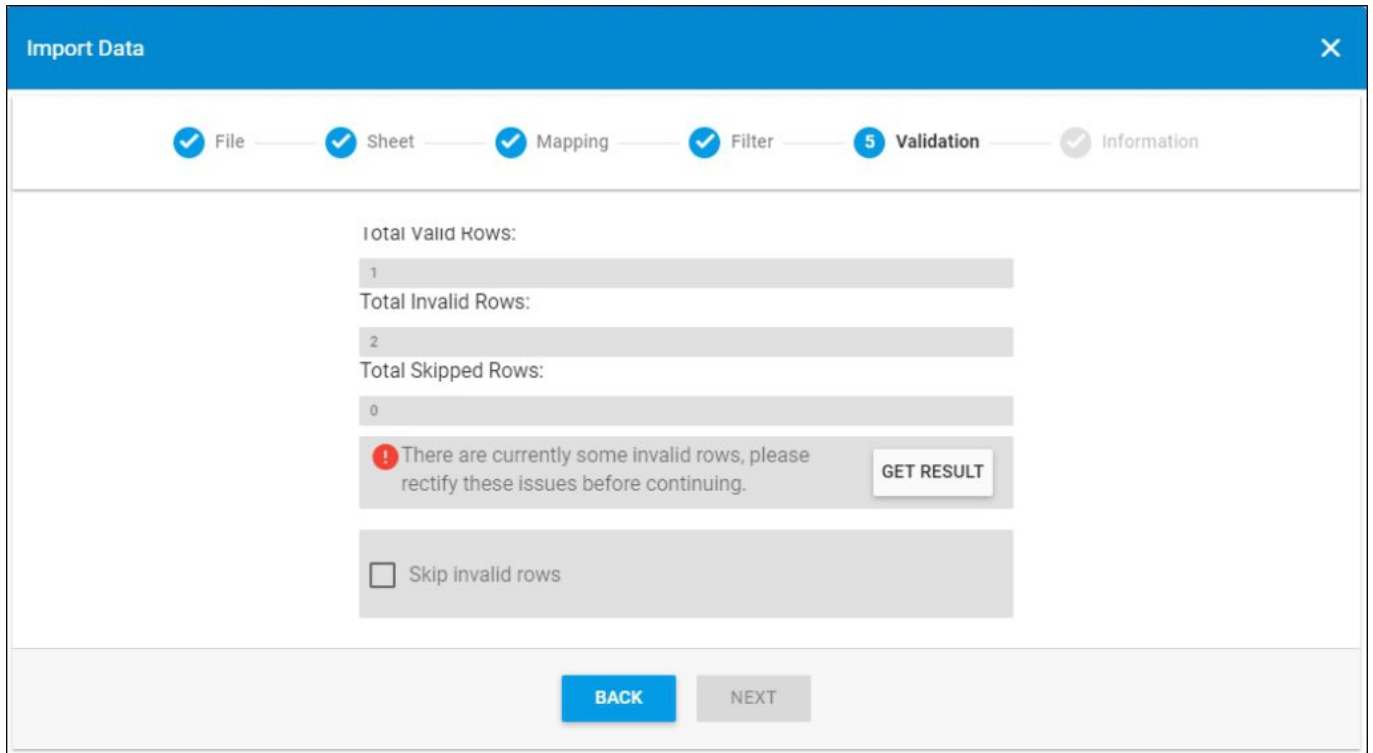

11. Click **Submit**, the progress is displayed,

12. Wait until the job is finished, then refresh the page, values are imported.

### Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to

*Skip invalid rows* as shown in the below example:

Import Data
