

Attribute vetting list

Through this tab, you can define values for attributes to enable users to select from them. You can also add JSON value to the criteria field to make the attribute value dependent on another value. The **Attribute Vetting List** tab appears as shown below:

<	ck Definition	Tree	Attribute Vetting List	Seller Users	Request Attributes	Request Reasons	Linked Catalogs	Linked Attributes	Ti	>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	0 of 1 Selected							
Attribute Name	System Name	Values	Actions							
<input type="checkbox"/> Category	category_tw	short,skirt,tshirt	3							

The page lists the vetting list values defined for the attributes. You can either add values for attributes one by one, or import a list of values for attributes as mentioned in the coming sections.

To add the list of values for an attribute, follow these steps:

1. Click , the following window appears:

New Record

Attributes

Values

Criteria

CANCEL

SAVE

SAVE AND NEW

2. Select the attribute to which you want to add values,
3. Enter the value(s) then press Enter, it appears as shown in the below example:

New Record

Attributes

Color

Values

Criteria

CANCEL

SAVE

SAVE AND NEW

4. Enter the criteria you want in JSON format, if you want this attribute to be dependent

on another attribute or more,

5. Click **Save** to add the values and close the window or **Save and New** to save it and open a new window.
