

# Configurations

Through this tab, you can view and manage the catalog configurations that specify for example, the layout of colorway details window, the disabled modules for the catalog, different labels used throughout the system, templates, etc. These configurations are defined through the Vetting lists as mentioned in “[Configurations](#)” and added to the catalog through this tab. Go to **Configurations** tab, the following page appears:

Id	Name	Value	Default Value Type	Actions
92,981	T1S-BrowseByAttribute	{ "Merch_Comments": { "sortDirection": "ascending" }, "ParentModelName" }	nvarchar	
93,536	T1S-EnableNewStyleDetails	false	bool	
92,989	T1S-ModelLabel	Model	nvarchar	
93,529	T1S-DefaultFilterAttributes	["StateName","ArticleNumber","ModelName","Status","Gender"]	nvarchar	
92,990	T1S-ArticleLabel	Colorway	nvarchar	
93,234	WhiteboardImagePlaceholderOptions	{ key: "TEMP", sortOrder: 1000 }	nvarchar	
93,233	T1S-ArticleDetailsTemplate2	<div> <article-info-row :values="[StateName]" :data="data" :titles="[Colon	nvarchar	
92,947	T1S-ExcludeArticleAttributes	["ShipmentStartDate","ShipmentEndDate"]	nvarchar	
92,948	T1S-DisableModules	["collections"]	nvarchar	
92,949	T1S-ArticleDetailsFlags	[ { "name": "co_flag", "color": "#B20000", "initials": "CO", "value": "true" }, { "n	nvarchar	
92,950	T1S-ArticleThumbnailFlags	[ { "name": "co_flag", "color": "#B20000", "initials": "CO", "value": "true" }, { "n	nvarchar	

Configuration Id, name, value and default value type, and updated date are displayed. The following sections discuss how to add a new configuration, edit and delete any of the existing ones.
