

## Import configurations

To import a list of configurations, you need to include the configuration name and value in an Excel sheet. To do so, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right. Below the header is a progress bar with six steps: 1 File (active), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Under the progress bar, there are two radio button options: "Last Used File" (unselected) and "New File" (selected). Below these options is a "Filename:" label followed by a text input field containing "[none]" and a "SELECT..." button. At the bottom of the window, there are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

Import Data

File Sheet 3 Mapping Filter 5 Validation Information

Please select the sheet that contains the data you wish to import

Configurations

BACK NEXT
