

Delete segmentation

To delete a segmentation, follow these steps:

1. Select the segmentation you want to delete by following any of these methods:
 - Select “Delete Record” from the Actions menu next to the segmentation you want to delete,
 - Click the checkbox on top of the records to select all segmentations then click the **Delete** button,
 - Click the checkbox(es) next to the segmentations you want then click the **Delete** button,

The following message appears showing the number of selected records:

2. Click **Delete Record** to confirm deleting the segmentation. Its status changes to “Inactive”.

You can activate deleted segmentations by selecting “Activate Record” from the Actions menu or selecting the inactive segmentations then clicking the **Activate** button.

Note:

- These buttons are not available if the selected catalog is a child catalog with the “Segmentation Mirroring” option activated.
