

Overwrite colorway code (bulk)

You can import a file with colorway number and color code to update the colorway codes in bulk which will save the time and effort. To do so, follow these steps:

1. Click **Overwrite colorway code (bulk)**, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1 File (active), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Underneath the progress bar, there are two radio button options: "Last Used File" (unselected) and "New File" (selected). Below these options is a text input field labeled "Filename:" containing the text "[none]", followed by a "SELECT..." button. At the bottom of the window, there are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

Import Data

File Sheet Mapping Filter **5** Validation Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.

Search

Colorway Number*	=	Colorway Number*	Colorway Number	X
Color Code*	=	Color Code*	Color Code	X

BACK NEXT

6. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

Import Data
