

Packages

A packages is a catalog data export created for T1 Studio if the catalog is not Live. T1 Studio will automatically detect and use the latest package indicated by the version number to import and update its catalog data.

Through this page you can view packages already created for a catalog and create new ones which contain all entities of the database related to the catalog such as articles, article segmentations, article sizes, prices, and catalogs, etc.

To view packages, select the catalog you want then click **Packages** from the left side menu, the following page appears:

The screenshot shows the 'Packages' page in T1 Studio. On the left is a dark sidebar menu with 'Packages' highlighted in blue. The main area displays a table of packages for a selected catalog. At the top of the table, it says '0 of 75 Selected'. The table has columns for File Name, Version, Package Status, Status, Updated Date, and Actions. All packages shown are 'COMPLETE' and 'Active'.

File Name	Version	Package Status	Status	Updated Date	Actions
seller-2/catalog-10/datapackages/75.zip	75	COMPLETE	Active	May 20, 2020	
seller-2/catalog-10/datapackages/74.zip	74	COMPLETE	Active	May 18, 2020	
seller-2/catalog-10/datapackages/73.zip	73	COMPLETE	Active	May 17, 2020	
seller-2/catalog-10/datapackages/72.zip	72	COMPLETE	Active	May 12, 2020	
seller-2/catalog-10/datapackages/71.zip	71	COMPLETE	Active	May 12, 2020	
seller-2/catalog-10/datapackages/70.zip	70	COMPLETE	Active	May 10, 2020	
seller-2/catalog-10/datapackages/69.zip	69	COMPLETE	Active	May 10, 2020	
seller-2/catalog-10/datapackages/68.zip	68	COMPLETE	Active	May 10, 2020	
seller-2/catalog-10/datapackages/67.zip	67	COMPLETE	Active	Apr 5, 2020	
seller-2/catalog-10/datapackages/66.zip	66	COMPLETE	Active	Apr 5, 2020	
seller-2/catalog-10/datapackages/65.zip	65	COMPLETE	Active	Apr 2, 2020	
seller-2/catalog-10/datapackages/64.zip	64	COMPLETE	Active	Apr 1, 2020	
seller-2/catalog-10/datapackages/63.zip	63	COMPLETE	Active	Apr 1, 2020	

Created packages for the selected catalog are listed. For each one, its version, package status, record status, and update date are displayed.

You can view any of the existing packages and download it to your computer, and create a new package as mentioned in the coming sections.
