

Import customer locations

You can import a file with customer locations instead of adding them individually which will save you time and effort. The customer number, location code, name, and country are mandatory columns. To import a file with locations, follow these steps:

1. Click the **Import locations** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1 File (selected), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Below the progress bar, there are two radio button options: "Last Used File" (unselected) and "New File" (selected). Below these options is a text input field labeled "Filename:" containing the text "[none]", and a "SELECT..." button to its right. At the bottom of the window, there are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

Import Data

File Sheet **3** Mapping Filter 5 Validation Information

Please select the sheet that contains the data you wish to import

customer locations

BACK NEXT

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:
