

## Import master size scales

You can import a file with master size scales instead of adding them individually which will save you time and effort. The size scale name, sizes, and status are mandatory columns. To import a file with size scales, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a dialog box titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1 File (selected with a blue circle), 2 Sheet, 3 Mapping, 4 Filter (checked with a grey checkmark), 5 Validation, and 6 Information (checked with a grey checkmark). The main content area has two radio buttons: "Last Used File" (unselected) and "New File" (selected with a blue circle). Below the radio buttons is a text field labeled "Filename:" containing the text "[none]" and a "SELECT..." button. At the bottom of the dialog are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

The screenshot shows a software window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". Each step has a checkmark icon. The "Validation" step is highlighted with a blue circle containing the number "5". Below the progress bar, the text "Please select the sheet that contains the data you wish to import" is displayed. Underneath this text is a dropdown menu with the text "Master Size Scales" and a downward arrow. At the bottom of the window, there are two blue buttons labeled "BACK" and "NEXT".

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

### Import Data

✓ File — ✓ Sheet — ✓ **Mapping** — ✓ Filter — 5 Validation — ✓ Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

🔍 Search

|             |   |              |            |   |
|-------------|---|--------------|------------|---|
| Size Scale* | = | Size Scale * | Size Scale | × |
| Sizes*      | = | Sizes *      | Sizes      | × |

6. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

The screenshot shows a dialog box titled "Import Data" with a close button (X) in the top right corner. Below the title bar is a progress indicator with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". The "Validation" step is highlighted with a blue circle containing the number "5". Below the progress indicator, the text asks: "Would you like to import all the rows in the sheet or only the rows that match a specific criteria?". There are two radio button options: "Import All Rows" (which is selected) and "Import Only the Rows that match the following criteria:". At the bottom of the dialog box are two buttons: "BACK" and "NEXT".

7. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
8. Click **Next**, the following window appears:

9. Click **Next**, the following window appears:

10. Click **Submit**, the progress is displayed,
11. Wait until the job is finished, then refresh the page, the imported values are listed.

**Notes:**

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:
