

Import watch filters

You can import a file with watch filters instead of adding them individually which will save you time and effort. To import a file with watch filters, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a close button (X) in the top right corner. Below the title bar is a progress indicator with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". The "Mapping" step is currently active, indicated by a blue circle with the number "3" inside. The other steps are marked with checkmarks. Below the progress indicator, there are two radio button options: "Last Used File" (unselected) and "New File" (selected). Below these options is a text input field labeled "Filename:" containing the text "Watch Filters.xlsx". To the right of the input field is a button labeled "SELECT...". At the bottom of the window, there are two buttons: "BACK" (disabled) and "NEXT" (active).

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

Import Data

File Sheet **3** Mapping Filter Validation Information

Please select the sheet that contains the data you wish to import

Watch Filters

BACK NEXT

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

Import Data

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.

🔍 Search

Name*	=	Name*	Name	×
User Name*	=	User Name*	User Name	×

BACK **NEXT**

6. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

Import Data

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

Import All Rows

Import Only the Rows that match the following criteria:

BACK **NEXT**

7. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
8. Click **Next**, the following window appears:

Import Data

File Sheet Mapping Filter **Validation** Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:
Finished

Total Valid Rows:
4

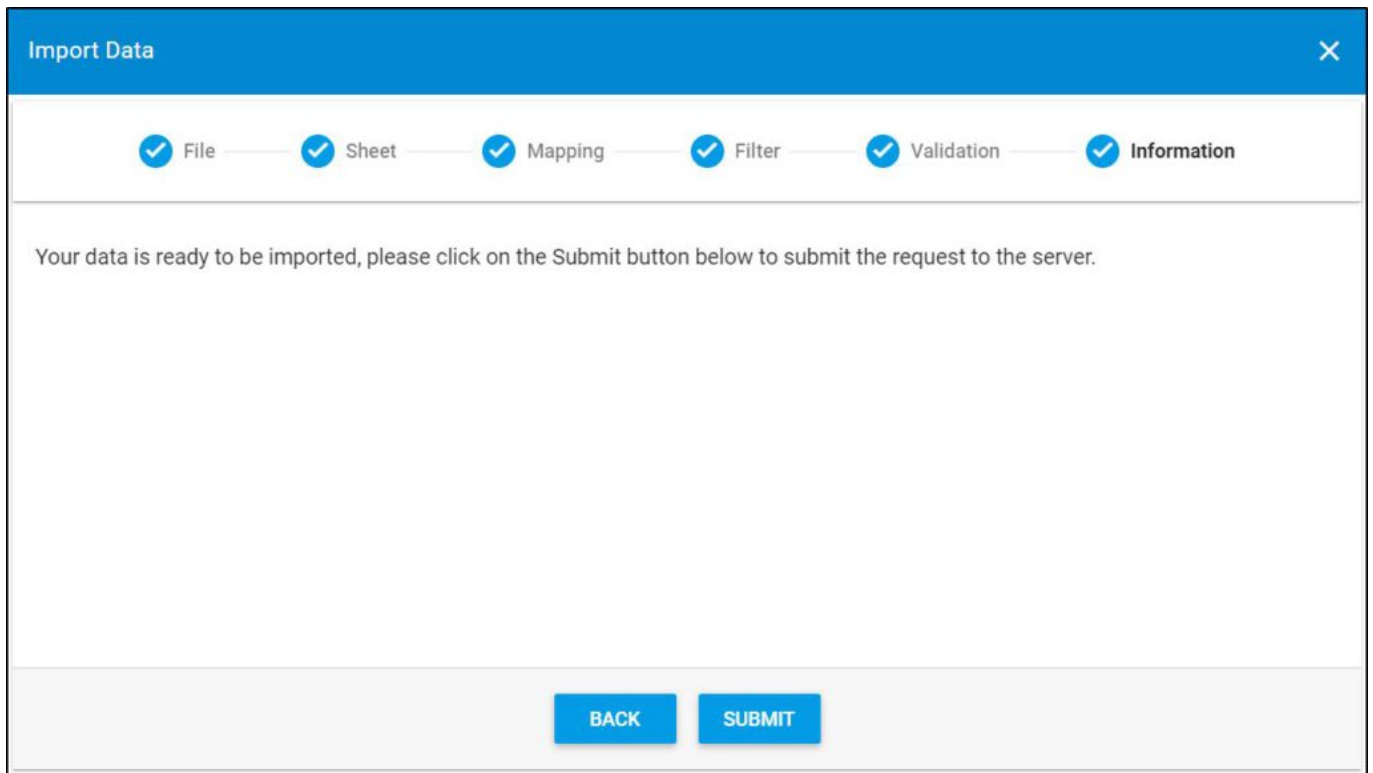

Total Invalid Rows:
0

Total Skipped Rows:
0

No issues were detected in your source file. The data is ready to be submitted.

BACK NEXT

9. Click **Next**, the following window appears:

9. Click **Submit**, the progress is displayed,
10. Wait until the job is finished, then refresh the page, the imported values are listed.

Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data ×

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5 Validation** — ✓ Information

Total Valid Rows:
1

Total Invalid Rows:
2

Total Skipped Rows:
0

! There are currently some invalid rows, please rectify these issues before continuing. GET RESULT

Skip invalid rows

BACK NEXT

The **Next** button is activated, and you can import the valid rows.
