

## Set sizes (Bulk)

### Notes:

- Size scales of the inherited catalog articles should always be the same or within the range of the size scales set for the master catalog articles. If you are importing size scales for master catalog articles that will cause the size scales of the inherited catalog articles to be out of range, T1 will automatically set the size scales of the master to the inherited catalog articles.
- For inherited catalogs, imported size scales can either be the same or a subset of the master catalog size scales.

After importing size scales on the seller level, you can set those size scales to articles using the **Import** function.

Make sure to have the articles listed in an Excel sheet with the following columns: Size Scale and Article Number, as shown in the below example:

The image shows a screenshot of an Excel spreadsheet with the following data:

	A	B	C	D	E
1	Size Scale	Article Number			
2	Letters	133112			
3	Letters	121212			
4	Shoes	119911			
5	Numbers	115511			
6	Letters	166121			
7					

The spreadsheet interface includes a status bar at the bottom with the word "Sizes" highlighted in green, a plus sign icon, and navigation arrows.

To import a file with size scales of articles, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows the 'Import Data' dialog box with a blue header and a close button (X) in the top right. A progress bar at the top indicates the current step: 1 File (active), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Below the progress bar, there are two radio button options: 'Last Used File' (unselected) and 'New File' (selected). A text input field labeled 'Filename:' contains the text '[none]'. To the right of the input field is a 'SELECT...' button. At the bottom of the dialog are two buttons: 'BACK' and 'NEXT'.

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field as shown in the below example:

The screenshot shows the 'Import Data' dialog box with the same layout as the previous one. The progress bar now shows: 1 File (checked), 2 Sheet (active), 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). The 'New File' radio button remains selected. The 'Filename:' input field now contains the text 'Size Scales.xlsx'. The 'SELECT...' button is still present. The 'NEXT' button at the bottom is now highlighted in blue, indicating it is the active button.

4. Click **Next**, the following window appears:

**Import Data** [X]

File — 
  **Sheet** — 
  **3 Mapping** — 
  Filter — 
  5 Validation — 
  Information

Please select the sheet that contains the data you wish to import

Sizes ▼

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet, then click **Next**, the following window appears:

**Import Data** [X]

File — 
  Sheet — 
  Mapping — 
  Filter — 
  **5 Validation** — 
  Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

Size Scale *	=	<div style="border: 1px solid #ccc; padding: 2px;"> <small>Size Scale *</small>            Size Scale <span style="float: right;">X</span> </div>
Article Number *	=	<div style="border: 1px solid #ccc; padding: 2px;"> <small>Article Number *</small>            Article Number <span style="float: right;">X</span> </div>

6. Select the column of the sheet that matches each field, then click **Next**, the following window appears:

**Import Data** [X]

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

Import All Rows

Import Only the Rows that match the following criteria:

**BACK** **NEXT**

7. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
8. Click **Next**, the following window appears:

**Import Data** [X]

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — ✓ Validation — ✓ Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:

Finished

Total Valid Rows: 5

Total Invalid Rows: 0

Total Skipped Rows: 0

✓ No issues were detected in your source file. The data is ready to be submitted.

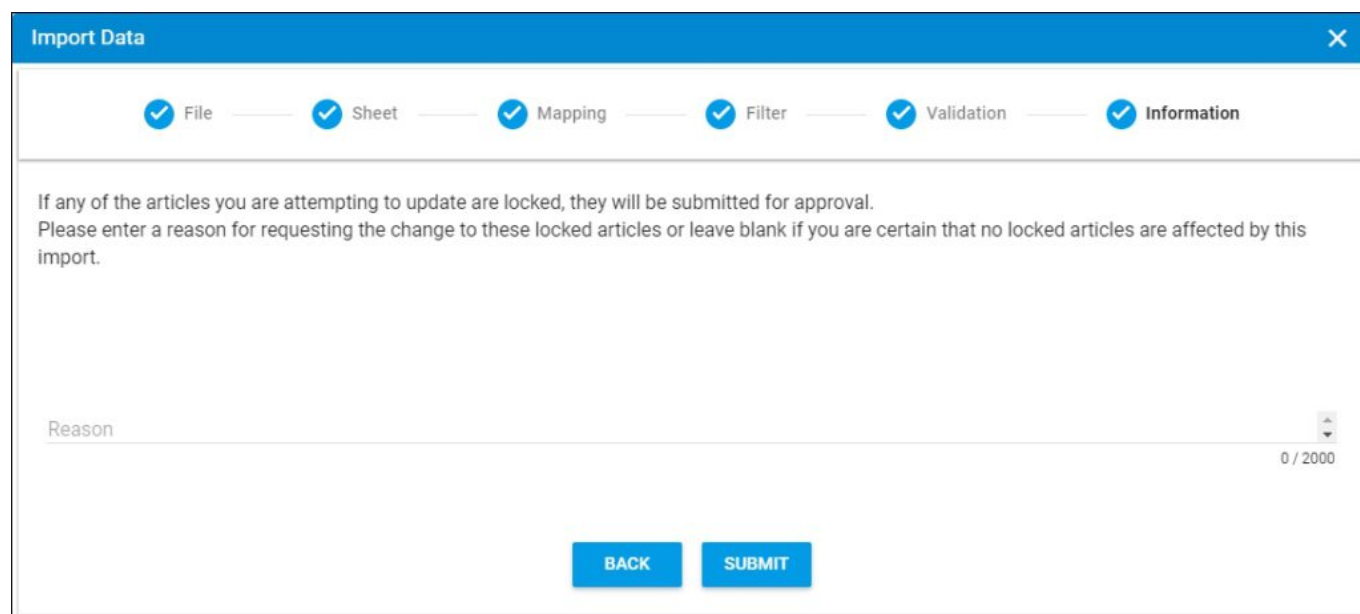

**BACK** **NEXT**

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

If there is an error in the sheet you are trying to import such as empty size scale, the

validation window will show an error. Make the necessary changes and import the sheet again by closing the import dialog and clicking the **Import** button then continue with the steps mentioned above.

9. Click **Next**, the following window appears:

If any of the articles are locked and the “External Change Management” flag is not activated for the catalog, you need to enter a reason for size change then click Submit. While if the “External Change Management” flag is activated, then locking at least one article will prevent changes to prices and sizes of the whole catalog articles. These changes will be managed through an external system and not through T1. Please note that this flag is managed by the Trasix Support team.

10. Click **Submit**, the progress is displayed,

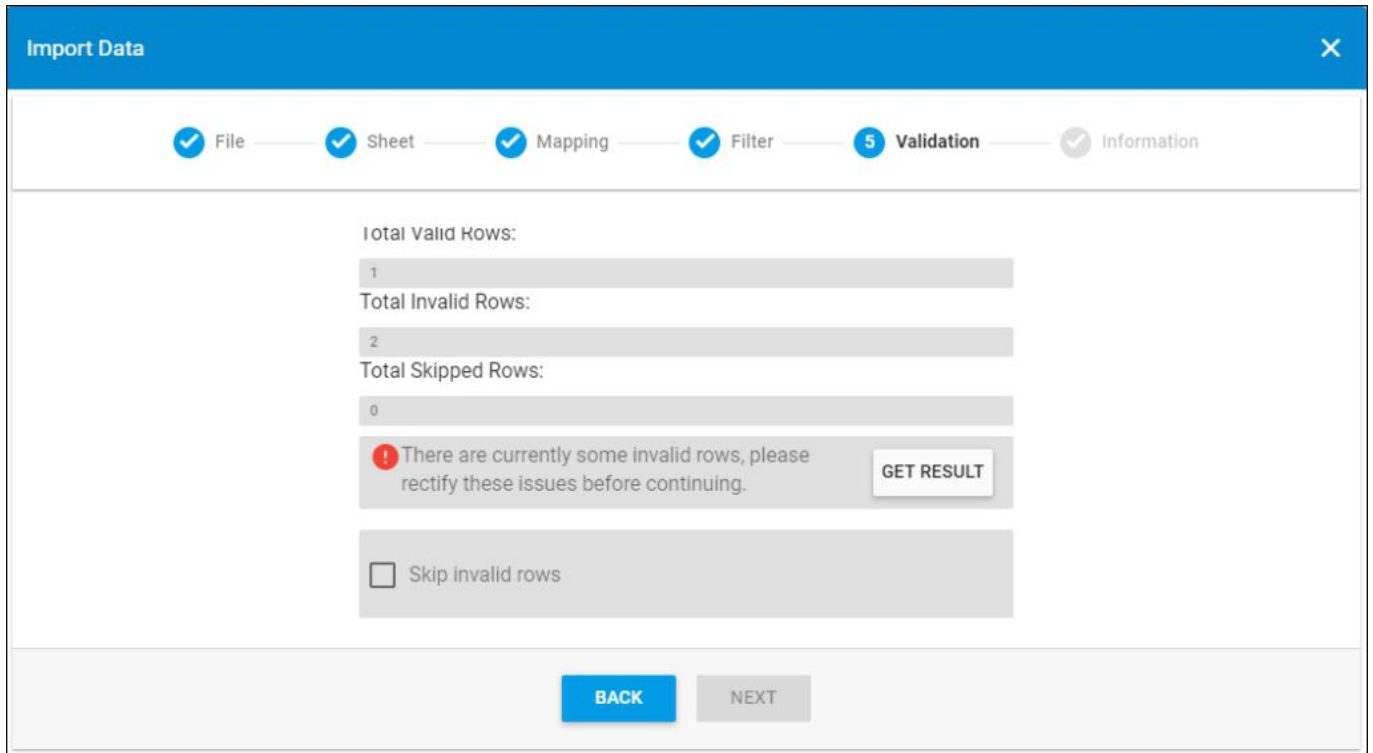

11. Wait until the job is finished, sizes are added to each article and you can view them by going to the **Sizes** tab for the article you want, the list of sizes appears as shown in the below example:

You can also view sizes in the “[Sizes](#)” module.

#### Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to

*Skip invalid rows* as shown in the below example:

Import Data

File Sheet Mapping Filter **5 Validation** Information

Total Valid Rows:  
1

Total Invalid Rows:  
2

Total Skipped Rows:  
0

**!** There are currently some invalid rows, please rectify these issues before continuing. **GET RESULT**

Skip invalid rows

**BACK** NEXT

The **Next** button is activated, and you can import the valid rows.
