

Attribute vetting list

Through this tab, you can define values for attributes to enable users to select from them. You can also add JSON value to the criteria field to make the attribute value dependent on another value. The **Attribute Vetting List** tab appears as shown below:

Attribute Name	System Name	Values	Actions
Category	category_tw	short,skirt,tshirt	3

The page lists the vetting list values defined for the attributes. You can either add values for attributes one by one, or import a list of values for attributes as mentioned in the coming sections.

To add the list of values for an attribute, follow these steps:

1. Click , the following window appears:

The screenshot shows a 'New Record' form with a blue header bar containing the title 'New Record' and a close button 'X'. Below the header, there are three input fields: 'Attributes', 'Values', and 'Criteria'. The 'Values' field has a placeholder text 'Use enter to add value'. At the bottom of the form, there are three buttons: 'CANCEL', 'SAVE', and 'SAVE AND NEW'.

2. Select the attribute to which you want to add values,
3. Enter the value(s) then press Enter, it appears as shown in the below example:

The screenshot shows the 'New Record' form after some data has been entered. The 'Attributes' field now contains 'Color' with a close button 'X' to its right. The 'Values' field contains three tags: 'Black x', 'White x', and 'Blue x', followed by the placeholder text 'Use enter to add value'. The 'Criteria' field is empty. The 'CANCEL', 'SAVE', and 'SAVE AND NEW' buttons are still present at the bottom.

4. Enter the criteria you want in JSON format, if you want this attribute to be dependent

on another attribute or more,

5. Click **Save** to add the values and close the window or **Save and New** to save it and open a new window.
