

## Manage vetting list

You can add values for bucket attributes to enable users to select any of those values. To do so, follow these steps:

1. Select **Manage vetting list** from the Actions menu next to the attribute you want, the following window appears:

The screenshot shows a modal window titled "Edit Record" with a close button (X) in the top right corner. The window contains three main sections:

- Attribute Name \***: A text input field containing "Risk level". To the right of the input field is a character count "10 / 200".
- Allowed Values**: A section with a text input field containing the placeholder "Use enter to add value".
- Criteria**: A text input field that is currently empty.

At the bottom right of the window, there are two buttons: a dark gray "CANCEL" button and a blue "SAVE" button.

2. Select the attribute to which you want to add values,
3. Enter the value(s) then press Enter, it appears as shown in the below example:

Edit Record

Attribute Name \*

Risk level

10 / 200

Allowed Values

high × low × Use enter to add value

Criteria

CANCEL

SAVE

4. Enter the criteria you want in JSON format, if you want this attribute to be dependent on another attribute or more,
5. Click **Save** to add the values and close the window.
