

## Request attributes

Through this tab, you can define the list of attributes that can be updated when requests are created. This tab is active only if the Requests option is activated for the catalog. Go to **Request Attributes** tab, the following page appears:

Id	Attribute Id	Attribute Name	System Name	Attribute Type Id	Attribute Type Name	Actions
11	136	Comp Style Articles SS20	Comp_Style_Articles_SS20	1	nvarchar	
2	156	Approximate Units	approximate_units	1	nvarchar	
3	157	Additional Comments	Additional_comments	1	nvarchar	
1	33	Gender	Gender	1	nvarchar	

The request attributes are listed, for each one the attribute Id, name, system name, type Id and name, and the user who updated the attribute are displayed. You can add new attributes or delete any of them as mentioned in the coming sections.
