

Upload images

T1 allows you to upload a Zip folder that contains multiple images for articles instead of adding them individually. Uploaded image files should follow a naming convention to be linked automatically to their articles. The file name should be (ArticleNumber_Expression.imageExtension). The expression could be `_front` for front images or `_back` for back images as defined for the seller and the image extension could be `.jpeg`, `.jpg`, etc. Example: `112211_front.jpg`. This image will be automatically linked to article number 112211.

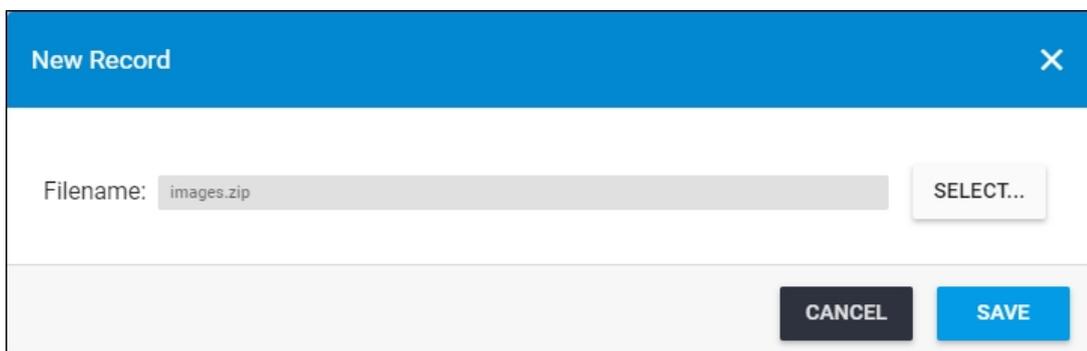

To upload images, follow these steps:

1. Click , the following window appears:

The screenshot shows a dialog box titled "New Record" with a close button (X) in the top right corner. Below the title bar, there is a "Filename:" label followed by a text input field containing "[none]". To the right of the input field is a "SELECT..." button. At the bottom right of the dialog, there are two buttons: "CANCEL" and "SAVE".

2. Click **Select** to browse for the zip folder you want to upload then click **Open**, the folder name appears in the field as shown below:

The screenshot shows the same "New Record" dialog box. The "Filename:" input field now contains "images.zip". The "SELECT..." button is still present. The "SAVE" button at the bottom right is now highlighted in blue, while the "CANCEL" button remains grey.

3. Click **Save**, the upload progress appears,
4. Wait until the job is finished, then refresh the page.

Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the images are not mapped to an article due to incorrect file name, these images are listed in the Unmatched Images page and you can assign them to their article from there. For more information, please refer to "[Unmatched images](#)".
- Image sort order is taken from the image type sort order defined for the seller by the Trasix support team.
