

## Import prices for multiple articles - Linear view

In linear view, to import a file with prices, make sure to have the articles listed in an Excel sheet with the following columns: Article Number, Price Group Id, and Price as shown in the below example:

	A	B	C	D	E	F
1	Article Number	Price Group Id	Price			
2	133112	Wholesale	250			
3	133112	Retail	270			
4	166121	Wholesale	300			
5	166121	Retail	320			
6	121212	Wholesale	250			
7	121212	Retail	300			
8	112211	Wholesale	150			
9	119911	Retail	170			
10	118811	Wholesale	380			
11	118811	Retail	400			
12						

### Notes:

- You can only import prices for “Editable” price groups.
- If the “External Change Management” flag is activated and at least one article is locked, you cannot import prices and the following message appears when you click the Import button:

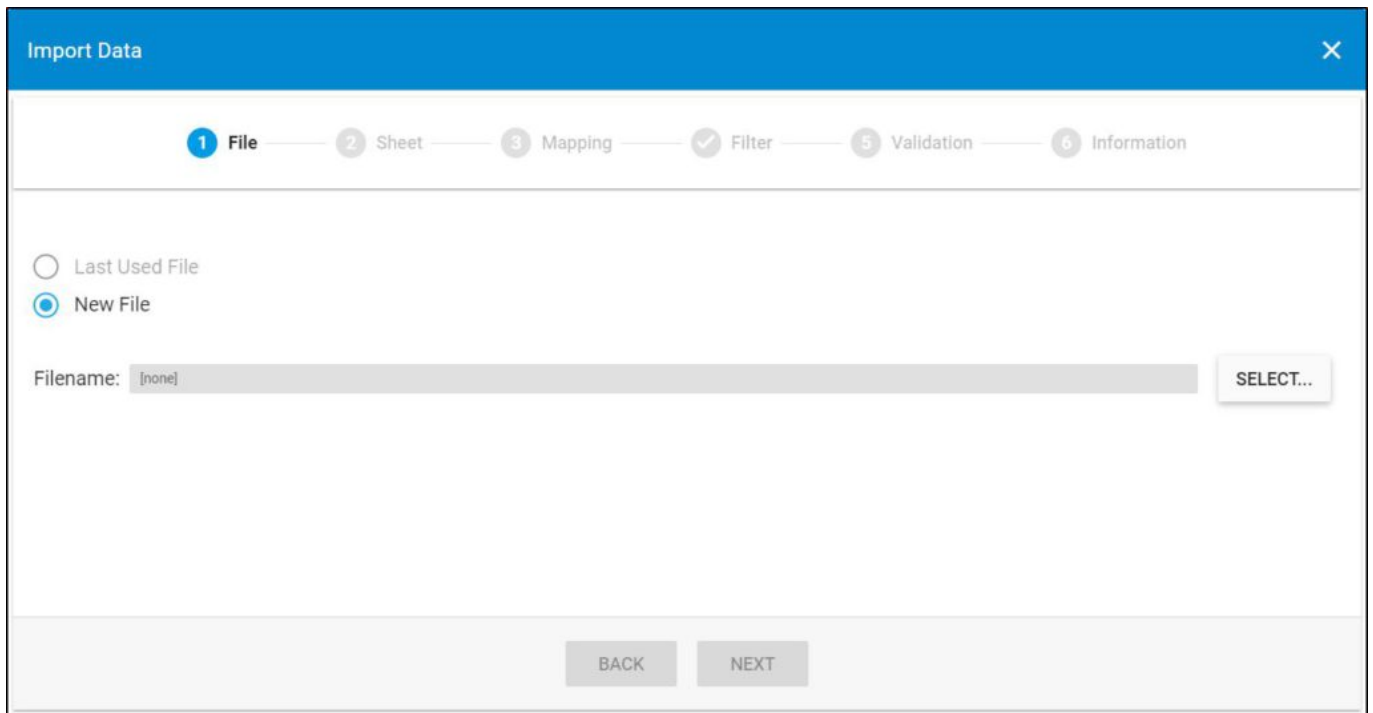

This flag and the link in the message are all managed by the Trasix support team.

- Depending on the catalog configuration, the number of decimals for prices is validated, so for example, you cannot enter a price with 3 decimals if the catalog is configured to 2 decimals, and an error within the Excel sheet to inform you so.

To import a file with prices, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1 File (active), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information. The main area contains two radio buttons: "Last Used File" (unselected) and "New File" (selected). Below the radio buttons is a text input field labeled "Filename:" with the placeholder text "[none]" and a "SELECT..." button to its right. At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
6. Click **Next**, the following window appears:

**Import Data** ✕

File
 Sheet
**3** Mapping
 Filter
**5** Validation
**6** Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

Article Number*	=	<input style="width: 90%;" type="text" value="Article Number*"/>
Price Group Id*	=	<div style="border: 1px solid #ccc; padding: 2px;"> <input style="width: 90%;" type="text" value="Price Group Id"/> <span style="float: right; font-size: small;">✕</span> </div>
<div style="border: 1px solid #ccc; padding: 2px; font-size: small;">Price*</div>		

BACK
NEXT

If the Price by style slider is activated for the catalog, the above window appears as shown below and you need to map the model number instead:

**Import Data** ✕

File
 Sheet
 Mapping
 Filter
**5** Validation
**6** Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

Model Number*	=	<div style="border: 1px solid #ccc; padding: 2px; font-size: small;">Model Number*</div> <input style="width: 90%;" type="text" value="Model Number"/> <span style="float: right; font-size: small;">✕</span>
Price Group Id*	=	<div style="border: 1px solid #ccc; padding: 2px;"> <input style="width: 90%;" type="text" value="Price Group Id"/> <span style="float: right; font-size: small;">✕</span> </div>
<div style="border: 1px solid #ccc; padding: 2px; font-size: small;">Price*</div>		

BACK
NEXT

7. Select the column of the sheet that matches each field, you can search for the field you

want using the search field, then click **Next**, the following window appears:

Import Data

File Sheet Mapping Filter 5 Validation 6 Information

Would you like to import all the rows in the sheet or only the rows that match a specific criteria?

Import All Rows

Import Only the Rows that match the following criteria:

BACK NEXT

8. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
9. Click **Next**, the following window appears:

Import Data

File Sheet Mapping Filter Validation Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:  
Finished

Total Valid Rows:  
10

Total Invalid Rows:  
0

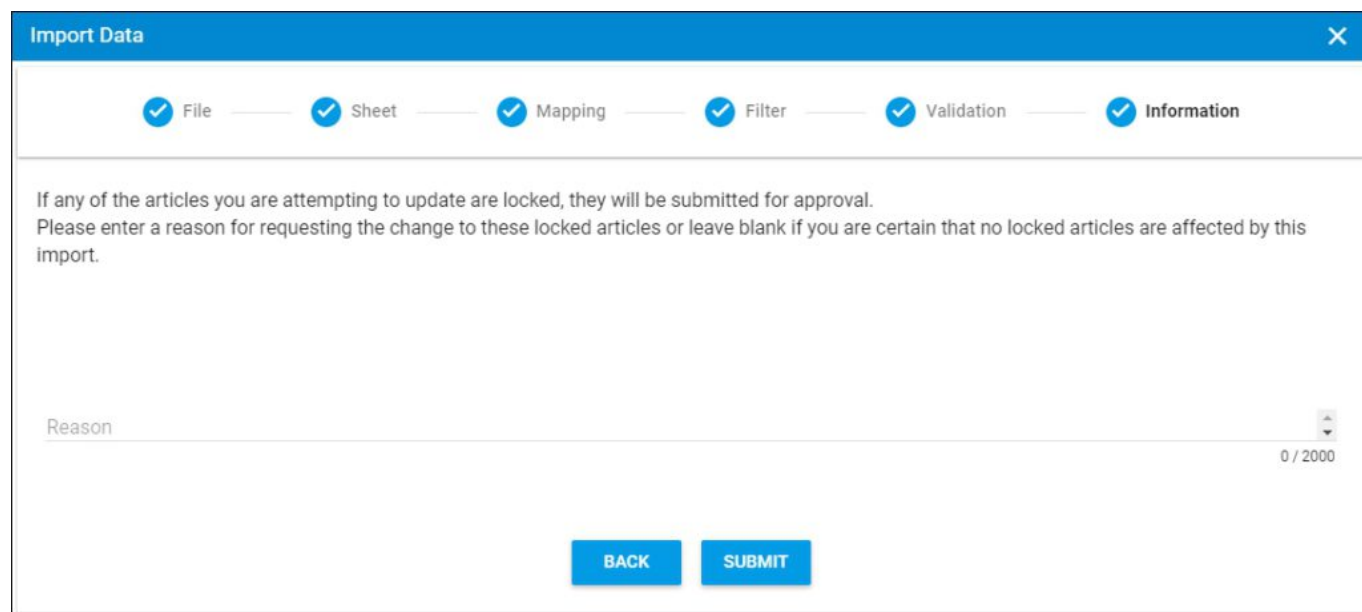

Total Skipped Rows:  
0

No issues were detected in your source file. The data is ready to be submitted.

BACK NEXT

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

10. Click **Next**, the following window appears:

Import Data

File Sheet Mapping Filter Validation Information

If any of the articles you are attempting to update are locked, they will be submitted for approval.  
Please enter a reason for requesting the change to these locked articles or leave blank if you are certain that no locked articles are affected by this import.

Reason 0 / 2000

BACK SUBMIT

11. Enter the reason for the price change, if you want,

12. Click **Submit**, a progress window is displayed,

13. Wait until the job is finished then refresh the page, the prices are imported.

#### Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data ×
