

## Import saved views

You can import a file with saved views instead of adding them individually which will save you time and effort. The saved view name is mandatory. To import a file with saved views, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a dialog box titled "Import Data" with a blue header and a close button. The dialog contains a progress bar with six steps: 1 File (selected), 2 Sheet, 3 Mapping, 4 Filter (checked), 5 Validation, and 6 Information (checked). Below the progress bar, there are two radio buttons: "Last Used File" (unselected) and "New File" (selected). Below the radio buttons, there is a text input field labeled "Filename:" with the placeholder text "[none]" and a "SELECT..." button to its right. At the bottom of the dialog, there are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field, click **Next**, the following window appears:

You can click **Back** to return to the previous window.

4. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
5. Click **Next**, the following window appears:

### Import Data ✕

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5** Validation — ✓ Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a \* are mandatory and must be mapped before continuing.

🔍 Search

Name*	=	Name* Name <span>✕</span>
Is Catalog Level	=	Is Catalog Level Is Catalog Level <span>✕</span>

**BACK** **NEXT**

6. Select the column of the sheet that matches each field, you can search for the field you want using the search field, then click **Next**, the following window appears:

The screenshot shows a dialog box titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: "File", "Sheet", "Mapping", "Filter", "Validation", and "Information". Each step has a checkmark icon, and the "Validation" step is highlighted with a blue circle containing the number "5".

Below the progress bar, the text reads: "Would you like to import all the rows in the sheet or only the rows that match a specific criteria?"

There are two radio button options:

- Import All Rows
- Import Only the Rows that match the following criteria:

At the bottom of the dialog box, there are two blue buttons: "BACK" and "NEXT".

7. Click the radio button next to the import method, either all rows or rows that match certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,
8. Click **Next**, the following window appears:

Import Data ×

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — ✓ **Validation** — ✓ Information

The sheet will be processed to identify if all the rows are valid to be imported

Status:  
Finished

Total Valid Rows:  
8

Total Invalid Rows:  
0

Total Skipped Rows:  
0

 No issues were detected in your source file. The data is

BACK NEXT

9. Click **Next**, the following window appears:

10. Click **Submit**, the progress is displayed,
11. Wait until the job is finished, then refresh the page, the imported values are listed. The imported values are also displayed in T1 Studio.

**Notes:**

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data ×

✓ File — ✓ Sheet — ✓ Mapping — ✓ Filter — **5 Validation** — ✓ Information

Total Valid Rows:  
1

Total Invalid Rows:  
2

Total Skipped Rows:  
0

! There are currently some invalid rows, please rectify these issues before continuing. GET RESULT

Skip invalid rows

BACK NEXT

The **Next** button is activated, and you can import the valid rows.
