

Import stock - Linear view

In linear view, you can import a file with stock quantities for colorway sizes. Colorways should be listed in an Excel sheet with colorway number, sizes, and the quantities (optional) for each stock definition added to the catalog.

To import a file with stocks, follow these steps:

1. Click the **Import** button, the following window appears:

The screenshot shows a window titled "Import Data" with a blue header and a close button (X) in the top right corner. Below the header is a progress bar with six steps: 1. File (active), 2. Sheet, 3. Mapping, 4. Filter (checked), 5. Validation, and 6. Information (checked). The main area contains two radio buttons: "Last Used File" (unselected) and "New File" (selected). Below these is a text input field labeled "Filename:" with the placeholder text "[none]" and a "SELECT..." button to its right. At the bottom of the window are two buttons: "BACK" and "NEXT".

2. Click **Select** to browse for the file you want to import,
3. Select the file then click **Open**, the name of the file you selected appears in its field,
4. Click **Next**, the following window appears:

You can click **Back** to return to the previous window.

5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
6. Click **Next**, the following window appears:

Import Data

File Sheet **3 Mapping** Filter 5 Validation Information

Please select the columns in your sheet that match each of the following fields. All fields marked with a * are mandatory and must be mapped before continuing.
