## **Import targets**

Through this process, you can add targets for the selected line plan catalog. To import a file with targets, at least one attribute should have a value to create the target according to this attribute. To import a file with targets, follow these steps:

1. Click the **Import** button, the following window appears:

Import Data		×
1 File	– 2 Sheet —— 3 Mapping —— S Filter —— 5 Validation —— 6	Information
<ul><li>Last Used File</li><li>New File</li></ul>		
Filename: [none]		SELECT
	BACK NEXT	

- 2. Click Select to browse for the file you want to import,
- 3. Select the file then click **Open**, the name of the file you selected appears in its field,
- 4. Click **Next**, the following window appears:

Import Data					×
V File	Sheet	3 Mapping	Filter —	5 Validation —	Information
Please select the	sheet that contains t	he data you wish to import	i i		
Targets	Ŧ				
		BACK	NEXT		

You can click **Back** to return to the previous window.

- 5. Select the sheet you want from the dropdown list in case your Excel file contains more than one sheet,
- 6. Click **Next**, the following window appears:

Sheet 🥢 🕑 Ma	apping —— 🧭 Filter —— 🌖 Validation —— 🧭 Informa	tion
t that match each of the	following fields. All fields marked with a * are mandatory and must be mapped	before continuing.
	Pre Style	
=	Prestyle	×
	Pre Article	
=	Pre Article	×
	Pre Productivity	
	et that match each of the	et that match each of the following fields. All fields marked with a * are mandatory and must be mapped = Pre Style Pre Style Pre Article Pre Article

7. Select the column of the sheet that matches each field, you can search for the field you want using the search field, at least one attribute should have a value, then click **Next**, the following window appears:

Import Data	×
Sheet — Sheet — Mapping — Silter — 5 Validation — Sinformation	
<ul> <li>Would you like to import all the rows in the sheet or only the rows that match a specific criteria?</li> <li>Import All Rows</li> <li>Import Only the Rows that match the following criteria:</li> </ul>	
BACK NEXT	

8. Click the radio button next to the import method, either all rows or rows that match

certain criteria, a validation window appears informing you if records are valid or not, if not, you need to fix the sheet then import the file again,

9. Click **Next**, the following window appears:

Import Data	×
Sheet Mapping Validation	Information
The sheet will be processed to identify if all the rows are valid to be imported	
Status:	
Finished Total Valid Rows:	
1 Total Invalid Rows:	
0	
o Total Skipped Rows:	
No issues were detected in your source file. The data is ready to be submitted.	
BACK NEXT	

The validation window shows the status of the import process, the total number of valid rows, and the total number of invalid and skipped rows. The above example shows that all the rows are valid.

10. Click **Next**, the following window appears:

Import Data	×
Sheet — Sheet — Mapping — Sheet — Information	
Your data is ready to be imported, please click on the Submit button below to submit the request to the server.	
BACK SUBMIT	

- 11. Click **Submit**, the progress is displayed,
- 12. Wait until the job is finished, then refresh the page, the imported targets are displayed.

## Notes:

- If changes are not reflected on the page, refresh the browser by pressing F5.
- If any of the records are invalid, you can skip them by clicking the checkbox next to *Skip invalid rows* as shown in the below example:

Import Data	×
Sheet — Sheet — Mapping — Sheet 5 Validation — Sinformation	
I otal Valid Rows:	
1 Total Invalid Rows:	
2 Total Skipped Rows:	
0	
There are currently some invalid rows, please rectify these issues before continuing.     GET RESULT	
Skip invalid rows	
BACK	

The Next button is activated, and you can import the valid rows.
