

Add comp style

To add comp styles, follow these steps:

1. Click **Add comp Style** then click **Next**, the following window appears:

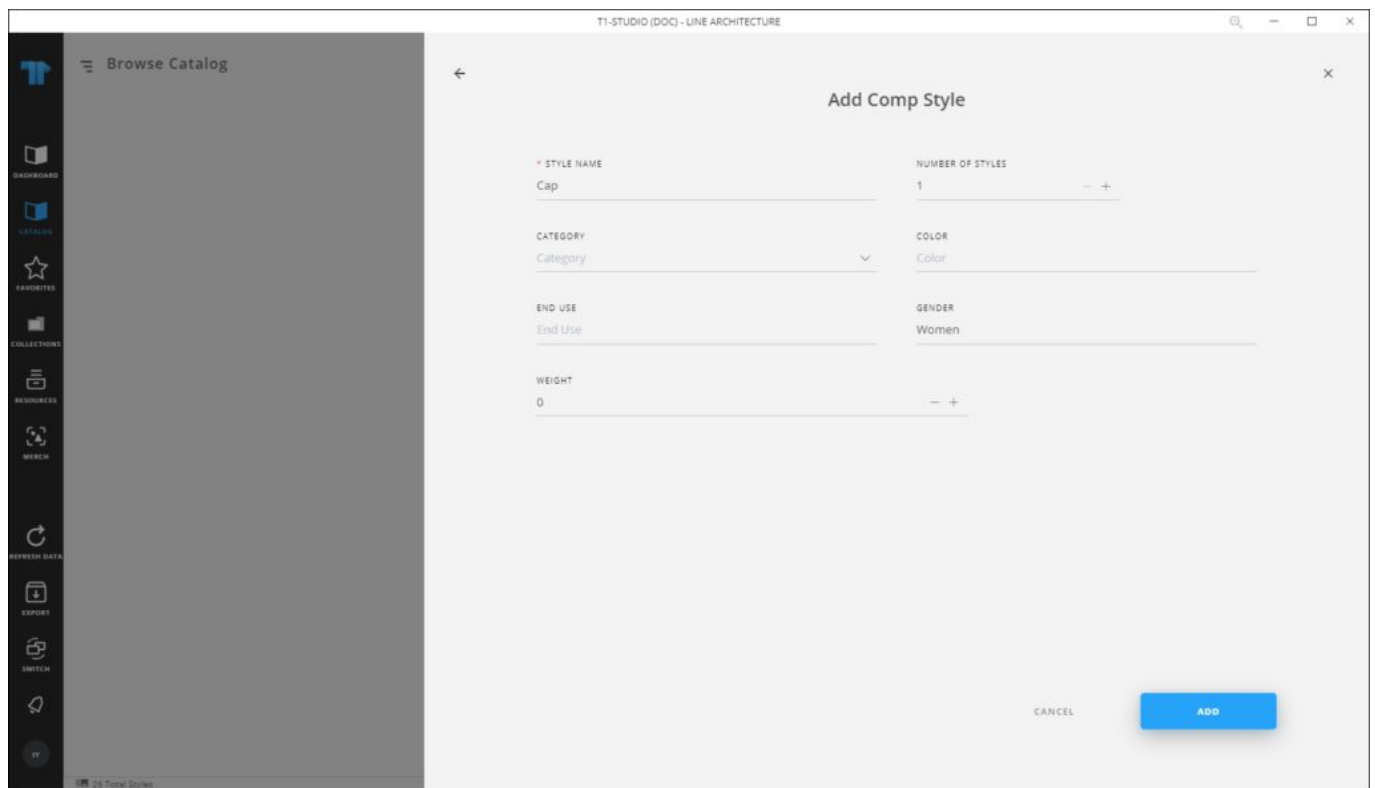

2. Select the article you want, or add all articles by pressing Ctrl + A,

Note:

- If you select more than one article, articles are added directly without updated the attributes.

3. Click **Next**, the following window appears to enable you to update the attributes:

4. Enter the style name, and the number of style copies you want to create,
5. Enter the attribute values,
6. Click **Add**, a window appears showing the progress. Once it is complete, click **Ok**, the article is added to the catalog tree as per the attribute values based on which the tree is defined.

Note:

- If any of the attributes is dependent on another attribute value, a tooltip appears next to the it. The attribute vetting list is managed by the Support team.
