

## Action bar controls

When you select any object on a slide, a set of controls are displayed in the lower part of the window as shown in the below example:

These controls may vary depending on the selected objects, i.e. article, image, shape, etc. Below is the list of actions that can be performed using these buttons:

Button	Action
<b>Add article details</b>	To add the article details for the selected article thumbnail(s) as configured for the selected catalog
<b>Edit favorites</b>	To update the favorite tags for the selected article(s)
<b>Edit articles</b>	To update article attributes
<b>Edit segmentations</b>	To update the segmentations for the selected article thumbnails
<b>Copy selection</b>	To copy the selected objects and paste them on the same slide or another slide
<b>Group</b>	To combine the selected objects into one group
<b>Ungroup</b>	To separate objects in a group back into individual objects

<b>Bring to front</b>	To move the selected object(s) in front of the other objects
<b>Send to back</b>	To move the selected object(s) behind the other objects
<b>Align</b>	To align and distribute objects on the slide
<b>Delete</b>	To delete the selected objects
<b>Crop image</b>	To remove or adjust the outside part of an image. This option is only available if the selected object is an image
