

Action bar controls

When you select any object on a slide, a set of controls are displayed in the lower part of the window as shown in the below example:

These controls may vary depending on the selected objects, i.e. article, image, shape, etc. Below is the list of actions that can be performed using these buttons:

Button	Action
Add article details	To add the article details for the selected article thumbnail(s) as configured for the selected catalog
Edit favorites	To update the favorite tags for the selected article(s)
Edit articles	To update article attributes
Edit segmentations	To update the segmentations for the selected article thumbnails
Copy selection	To copy the selected objects and paste them on the same slide or another slide
Group	To combine the selected objects into one group
Ungroup	To separate objects in a group back into individual objects

Bring to front	To move the selected object(s) in front of the other objects
Send to back	To move the selected object(s) behind the other objects
Align	To align and distribute objects on the slide
Delete	To delete the selected objects
Crop image	To remove or adjust the outside part of an image. This option is only available if the selected object is an image
