# Generate slide – Bucket view

You can create slides with saved views for articles viewed by an attribute and added as a saved view. To do so, follow these steps:

1. Click **Generate**, the following window appears:

2. Select "Bucket view" from the Template dropdown list, the article source is already selected and cannot be changed,
3. Click **Next**, the following window appears:

Generate Slides ✕

Template — ② Articles — ③ Map Columns — ④ Options — ⑤ Finish

* Select saved views that contains the articles you would like to use as a source for generating the slides

Saved Views

BACK   NEXT

4. Select the view you want, you can select more than one,
5. Click **Next**, the following window appears:

6. Select the folder to which you want to add the slides, or click **+** and add a new folder to which the generated slides are to be added,

7. Select whether you want the slide title to appear on every slide or not,

8. Click the slider button if you want to show the SKU count on slides,

9. Click the slider button if you want to show the style count on slides,

10. Select whether you want to fit the articles into one page, the number of columns field is disabled,

11. Select the bucket level attributes you want to include in the generated slides,

12. Click **Next**, the following window appears:

Generate Slides
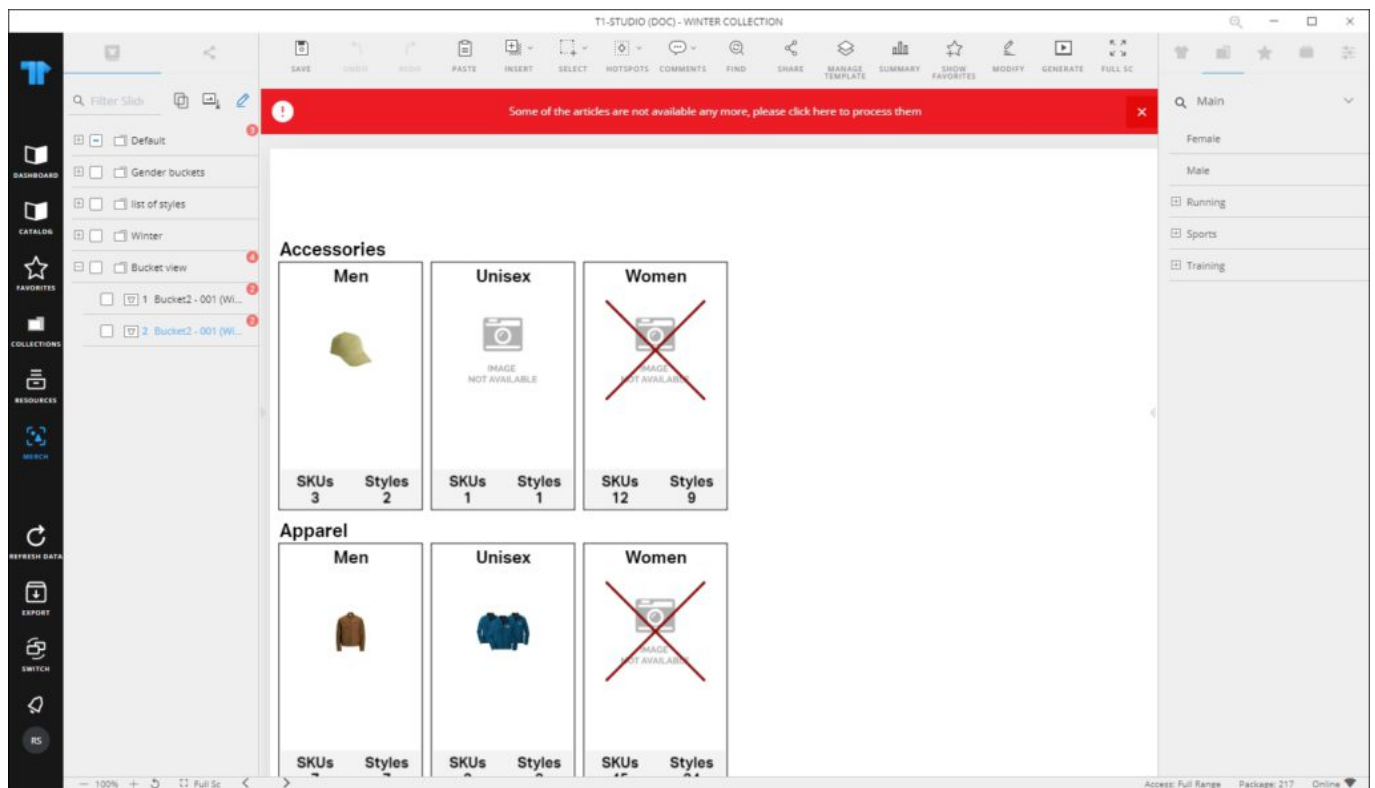

Template — Articles — Map Columns — Options — Finish (5)

We are now ready to generate the slides. Please click on the "Finish" button below to proceed...

BACK   FINISH

13. Click **Finish**, slides are generated as shown in the below example:

If the bucket contains inactive articles, it is marked in red as shown in the above example. You can remove or swab those articles as mentioned before.
