

Create watch filter

To create a new filter, follow these steps:

1. Click **Create watch filter**, the following window appears:

The screenshot shows the 'Create Watch Filter' dialog box in the TI-STUDIO (DOC) - WINTER COLLECTION application. The dialog box is open over a 'Watch Filters' table. The table has columns: Id, Name, UserName, Price Groups, and Segmentations. The 'Create Watch Filter' dialog box contains the following fields:

- NAME (with a sub-label 'Name')
- ARTICLE NUMBER (with a sub-label 'Article Number')
- MODEL NUMBER (with a sub-label 'Model Number')
- ARTICLE NAME (with a sub-label 'Article Name')
- CATEGORY (with a sub-label 'Category')
- COLORWAY (with a sub-label 'Colorway')
- COLORWAYDESCRIPTION (with a sub-label 'ColorwayDescription')
- END USE (with a sub-label 'End Use' and a radio button icon)
- FABRIC (with a sub-label 'Fabric')

At the bottom of the dialog box are 'CANCEL' and 'SAVE' buttons.

2. Enter the filter name,
3. Enter the attribute values based on which changes are tracked,
4. Click **Save**, the filter is created and changes done on articles will be logged and can be viewed in the Change log window.
