

Notifications

This module informs you when a new version is available or being updated on your machine. In addition, it provides the Change log which enables you to manage watch filters and monitor changes done on articles matching the filter within the specified period.

Adding, deleting, and updating attribute values, prices, and segmentations of the matching articles are displayed as shown in the below example:

Article Number	Article Name	Created Date			
1215968	Shirt	15 Feb 2021	integer3	2	7
1215968	Shirt	15 Feb 2021	integer3	2	7
21111	21111	14 Feb 2021	Status	PS	1
21111	21111	14 Feb 2021	Status	PS	1
21112	21112	14 Feb 2021	DateOption	Gender	GHS
21112	21112	14 Feb 2021	4 Feb 2021	Unisex	true
21112	21112	14 Feb 2021	DateOption	Gender	GHS
21112	21112	14 Feb 2021	4 Feb 2021	Unisex	true

By default, changes done in the past day are displayed and you can change the dates as required.

Also, requests for creating new articles, colorways, carryover, similar articles, and requests for activating and deactivating articles, as well as requests to edit article attributes, segmentations, and retail windows are logged. Below is an example:
