Copy resources

You can copy resources from the parent catalog to the child catalog. As mentioned before, this option is only available for child catalogs. To do so, follow these steps:

1. Click ⧉, the following window appears:

Resource files are listed, for each one the type, category, description, file name, file path, and icon are displayed.

2. Select the resource files you want to copy,
3. Scroll to the right then click the **Copy** button. The selected resources are added.
